QED · SCAFFOLDING · LTD

● Introduction

Q.E.D Scaffolding Ltd are one of the country's leading contract specialists offering economical solutions for all aspects of scaffolding, with safety as the ultimate priority throughout the company. Since the company's formation in the early 1990s the company has in excess of 100 skilled operatives and the drive continues to be to lead the way and provide the highest standards in scaffold solutions. We are full members of the **NASC** and CHAS Accredited. Enclosed within this publication are details of just a few of the areas in which Q.E.D Scaffolding Ltd specialise. Further information can be obtained on request.

● Safety

Along with our internal safety management and contract supervision, Q.E.D Scaffolding employ external safety consultants who carry out regular safety reports and provide updates in safety management and ever changing legislation.

● Training

Training is provided to all employees in conjunction with the CITB/CISRS training schemes, with all management being suitably qualified. All operatives are registered on the training programmes.

● Projects

Q.E.D Scaffolding offers the complete service for all our clients contracts specifications.

Our in house Contract Management team work in close liaison so that requirements can be clearly identified and the most cost effective solutions provided.

Q.E.D. Scaffolding can boast a huge number of satisfied clients and we have applied our expertise on many varying projects

Rail Work

Along with major projects, Rail Work is a field in which the company has vast experience with a number of operatives and management having attended specialist training.

Estimating

Our in house estimating division will advise customers of most economical solution for all their scaffolding needs.

All our estimators are conversant with current legislation and the H.S.E 's directives and will assist you from tender to contract completion.

Surveying

The Surveying Department provides a detailed breakdown and analysis for all valuations and applications.

This is done in such a manner that creates the atmosphere whereby a close working relationship between ourselves and our client can be achieved and maintained, which ultimately results in contracts being brought to a mutually beneficial conclusion.

Design

External and in house engineers provide full working drawings and calculations for all specialist scaffolds, along with the testing of anchors in compliance with our internal anchor and testing policies.

Innovations

The company is constantly taking on board new innovations and keeping in touch with the methods of modern construction, ensuring that all advances in technology and design are offered to all our customers.
